

Hearing Aid Maintenance Checklist

Every Day You Should...

- Wipe off the hearing aid with a dry cloth
- Test the hearing aid battery
- Check earmold opening for any wax buildup

Every Night You Should...

- Store hearing aid in a dry cool place – preferably using a dry-aid kit, if not the hearing aid case should suffice
- Turn off the hearing aid and open the battery compartment

Every Year You Should...

- Have your hearing and hearing aid checked by the audiologist
- Replace the plastic tubing (only if necessary)

As Needed You Should...

- Change the hearing aid battery
- Wash the earmold
- Check for any moisture
- Replace the earmold
- Replace the hearing aid device
